Why Litex Promo?

Experience and reputation

Our reputation in the industry is the best quality assurance of our services and products. Both small and medium-sized companies as well as global corporations work with us because they trust our experience and skills. We have been on the market for 30 years. During this time, we have managed to gain not only the trust of thousands of customers, but also a tremendous experience that allows us to create innovative solutions. We are not satisfied by mediocrity.

Print quality

We can say, in all confidence, that printing is our specialty. The extensiveness of our technical facilities allow us to offer customers various printing techniques, all tailored to their needs and the specificity of the project they want to implement. We have comprehensive competencies in digital printing, large format flatbed printing, rotary printing as well as manual screen printing. Our many years of experience in this industry assure you that the print on your product will be of the highest quality.

Corporate Social Responsibility

We have undertaken action to reduce our impact on the natural environment. Recently, we have introduced innovative recycled yarn to manufacture advertising media, we also actively contribute to environmental protection. Our approach is not limited to the processing of PET bottles for rPet yarn production, but we also aim to reduce the consumption of non-renewable raw materials and eliminate harmful emissions into the atmosphere in our production plants.

Therefore, we are proud to inform that **all parts of our parasols**: aluminum frame, polyester and acrylic canopies, **can be recycled**. The information diagram illustrating the recycling method is attached to the product at the customer's request. In addition to this, the plastic waste generated during the production cycle is processed and reused again.

Parasol Harmony has been designed to minimise the negative impact on the environment. We use less plastic and instead focus on using recycled and biodegradable materials. We have ensured that the foil in which the parasol is packed and the transport carton are also 100% eco-friendly. This is our contribution to reducing waste and protecting our planet.

Eco Line parasols are the perfect marketing solution for building brand visibility. The lightweight aluminium frame and a pole that can be divided into two parts not only save space and storage, but also contributes to much more economical transport. The parasol canopy can be fully printed and our technical facilities and many years of experience in this sector give you the assurance that the print will be of the highest quality.

Material

woven fabric

woven fabric made of recycled yarn

Easy Up is a line of parasols with a convenient and intuitive opening system. Just push handle up and secure the canopy. This simple method and wide range of available sizes make the parasols in this line perfect for gardens, hotel patios as well as beer gardens. The parasol's canopy, offered in the shape of a round or square, makes it the ideal medium to promote your brand.

Classic

				
Size	3 x 3 m	3,5 x 3,5 m	4 x 4 m	4 m / 8

+ Comfortable operation thanks to the classic string mechanism.

+ Pole structure optimized for open-close manual operation by a string.

+ Classic model of a sunshade parasol for universal use.

Printing techniques

sublimation printing

flat printing

manual printing

UV printing

Wind resistance

Material

woven fabric

woven fabric made of recycled yarn

Classic elegance. This is an incredibly versatile parasol with a wide range of uses. It has a simple and reliable corded opening system. The canopy is finished with a valve as standard, which allows air to circulate and increases the parasol's stability in the wind. The extraordinary functionality and versatility of this parasol makes it one of the most frequently purchased models.

Scan the code and learn more

Telescopic

Size	3 x 3 m	3,5 x 3,5 m	4 x 4 m

- + The telescopic mechanism used, improves the everyday use of the parasol.
- + The structure of the parasol canopy remains strong, even in large sizes.
- + Easy to open and close the canopy even with its large surface.

Printing techniques

sublimation printing

flat printing

manual printing

UV printing

Wind resistance

Material

woven fabric

woven fabric made of recycled yarn

Comfort and convenience. Parasols from Telescopic line are a solution that will work perfectly in restaurant gardens and cafes. Thanks to the telescopic construction, the parasol canopy automatically rises during closing and freely closes above the level of tables and chairs, saving you the effort to move them. The parasol canopy is normally finished with a vent that allows the air to pass through the canopy, thus increasing the stability of the parasol in the wind. It's also possible to finish the canopy with a second roof.

Scan the code and learn more

Size	3 x 3 m	3,5 x 3,5 m	4 x 4 m	5 x 5 m	5,5 m / 8

+ Quick-change canopy system and adjustable tension.

+ The opening mechanism in the form of a handle with a telescopic system improves opening.

+ A parasol with increased resistance to weather conditions, thanks to its durable structure.

UV printing

Wind resistance

Material

woven fabric

woven fabric made of recycled yarn

The Strong line was created for customers using parasols in particularly demanding weather conditions. This is one of our most durable parasols with reinforced, thicker pole and rib profiles. The parasol is provided with a telescopic opening system that lifts its canopy when closing. As a standard the parasol is finished with a vent that allows free air circulation through the canopy.

Scan the code and learn more

			
Size	6 x 6 m	7 x 7 m	8 m / 12

+ It is distinguished by its size while maintaining the appropriate stability of the entire structure.

+ The parasol is operated with a crank mechanism, which improves its operation.

+ Probably the largest sunshade parasol on the market.

Printing techniques

manual printing

Wind resistance

Material

woven fabric

Giants among parasols. Giant line parasols guarantee eye-catching look and the possibility of shading a very large area using one parasol. It's ideal solution for hotels and big restaurants. The reinforced, twelve-rib structure of the frame guarantee safety and stability. The practical telescopic opening system is operated with a crank. The canopy of each Giant parasol is finished with a second roof that ensures optimal air circulation.

Scan the code and learn more

Rectangular

Size	2 x 3 m	3 x 4 m

- + The original, rectangular shape of the parasol, distinguishable by a canopy with a longer side.
- + The used telescopic mechanism contributes to the improvement of its functionality.
- + A canopy with one longer side allows you to combine parasols into one roof.

Printing techniques

woven fabric made of recycled yarn

Stand out with modernity. Parasols with side leg Rio are the perfect, eye-catching advertising medium for exclusive brands, hotels and restaurants. The lateral position of the leg allows full use of the shaded area under the canopy, does not interfere with visibility and does not restrict placement of the furniture under the canopy. Parasols have adjustable angle of the canopy, so you can better match them to the solar conditions. Additionally parasols can be equipped with a mosquito net, which will be great for summer evenings.

Wind resistance

Material

woven fabric

woven fabric made of recycled yarn

The Easy Up line of parasols with the Easy To Transport function is the new structure, based on a two-piece pole, is resistant to gusts of wind, just like a standard parasol. We focus on versatility – the canopies used for Easy To Transport parasols will also fit standard frames in a given size and line. Thanks to the possibility of detaching the lower part of the pole, even large four-meter parasols become much simpler and more convenient to store, taking up less space than its classic counterparts. The parasols are easy to use and folding them is quick.
